CONTENTS

Symposium on Risk Factors and Mechanisms in Carcinogenesis

Metabolism of Carcinogens

G. Degen. Introduction: Risk Factors and Mechanisms in Carcinogenesis 3

L. J. Marnett. Prostaglandin synthase-mediated metabolism of carcinogens and a potential role for peroxyl radicals as reactive intermediates 5

D. W. Nebert, D. D. Petersen, and A. J. Fornace, Jr. Cellular responses to oxidative stress: the [*Ah*] gene battery as a paradigm 13

D. Wild. A novel pathway to the ultimate mutagens of aromatic amino and nitro compounds 27

K. Jahnke, G. H. Degen, and M. Buehner. Crystallization of prostaglandin-H synthase for X-ray structure analysis 33

K. L. Platt, M. Schollmeier, H. Frank, and F. Oesch. Stereoselective metabolism of dibenz(*a*,*h*)-anthracene to *trans*-dihydrodiols and their activation to bacterial mutagens 37

H. Glatt, R. Henschler, D. H. Phillips, J. W. Blake, P. Steinberg, A. Seidel, and F. Oesch. Sulfotransferase-mediated chlorination of 1-hydroxymethylpyrene to a mutagen capable of penetrating indicator cells 43

H. Thomas, L. Schladt, J. Doehmer, M. Knehr, and F. Oesch. Rat and human liver cytosolic epoxide hydrolases: evidence for multiple forms at the level of protein and mRNA 49

C. Gauss, J. Klein, K. Post, D. Suckau, K. Schneider, H. Thomas, F. Oesch, and M. Przybylski. Mass spectrometric peptide mapping analysis and structural characterization of dihydrodiol dehydrogenase isoenzymes 57

J. Doehmer, A. Seidel, F. Oesch, and H. R. Glatt. Genetically engineered V79 Chinese hamster cells metabolically activate the cytostatic drugs cyclophosphamide and ifosfamide 63

T. Friedberg, P. Siegert, M. A. Grassow, B. Bartlomowicz, and F. Oesch. Studies of the expression of the cytochrome P450IA, P450IIB, and the P450IIC gene family in extrahepatic and hepatic tissues 67

P. Steinberg, B. Schlemper, E. Molitor, K. L. Platt, A. Seidel, and F. Oesch. Rat liver endothelial and Kupffer cell-mediated mutagenicity of polycyclic aromatic hydrocarbons and aflatoxin B_1 71

Macromolecular/Cellular Targets of Cancer Risk Factors

P. Amstad and P. Cerutti. Genetic modulation of the cellular antioxidant defense capacity 77

R. P. P. Fuchs and R. Bintz. Activity of carcinogens that bind to the C8 position of guanine residues in an assay specific for the detection of −2 frameshift mutations in a defined hot spot 83

W. Adam, A. Beinhauer, T. Mosandl, C. Saha-Möller, F. Vargas, B. Epe, E. Müller, D. Schiffmann, and D. Wild. Photobiological studies with dioxetanes in isolated DNA, bacteria, and mammalian cells 89

E. Eder, C. Hoffman, H. Bastian, C. Deininger, and S. Scheckenbach. Molecular mechanisms of DNA damage initiated by α,β-unsaturated carbonyl compounds as criteria for genotoxicity and mutagenicity 99

W. Dekant, S. Vamvakas, M. Koob, A. Köchling, W. Kanhai, D. Müller, and D. Henschler. A mechanism of haloalkene-induced renal carcinogenesis 107

B. Epe, J. Hegler, and D. Wild. Identification of ultimate DNA damaging oxygen species .....

M. Metzler, G. Blaich and A. M. Tritscher. Role of metabolic activation in the carcinogenicity of estrogens: studies in an animal liver tumor model 117

B. Epe, U. Harttig, H. Stopper, and M. Metzler. Covalent binding of reactive estrogen metabolites to microtubular protein as a possible mechanism of aneuploidy induction and neoplastic cell transformation 123

R. Lorenz, T. Gollner, and K. Hempel. Quantification of thioguanine-resistant lymphocytes from mice irradiated *in vivo* 129

Molecular and Cellular Aspects of Transformation and Differentiation

G. Risse, M. Neuberg, J. B. Hunter, B. Verrier and R. Muller. Products of the *fos* and *jun* proto-oncogenes bind cooperatively to the AP1 DNA recognition sequence 133

H. von Melchner and H. E. Ruley. Retroviruses as genetic tools to isolate transcriptionally active chromosomal regions 141

E. J. Hall and T. K. Hei. Modulating factors in the expression of radiation-induced oncogenic transformation 149

T. Löffler, J. Wismar, H. Sass, T. Miyamoto, G. Becker, L. Konrad, M. Blondeau, U. Protin, S. Kaiser, P. Graf, M. Haas, G. Schuler, J. Schmidt, B. Phannavong, D. Gundacker, and E. Gateff. Genetic and molecular analysis of six tumor suppressor genes in *Drosophila melanogaster* 157

R. Merz, M. Schmidt, I. Török, U. Protin, G. Schuler, H-P. Walther, F. Krieg, M. Gross, D. Strand, and B. M. Mechler. Molecular action of the *l(2)gl* tumor suppressor gene of *Drosophila melanogaster* 163

L. Hieber, K. Trutschler, J. Smida, M. Wachsmann, G. Ponsel, and A. M. Kellerer. Radiation-induced cell transformation: transformation efficiencies of different types of ionizing radiation and molecular changes in radiation-transformants and tumor cell lines 169

R. Ebert, J. C. Barrett, R. W. Wiseman, R. Pechan, E. Reiss, G. Röllich, and D. Schiffmann. Activation of cellular oncogenes by chemical carcinogens in Syrian hamster embryo fibroblasts 175

P. A. Meyer and C. Kleinschnitz. Retinoic acid induced differentiation and commitment in HL-60 cells 179

R. Gieseler, F. Boege, and M. Clark. Alteration of topoisomerase II action is a possible molecular mechanism of HL-60 cell differentiation 183

C. D. Gerharz, J. Doehmer, H. Mayer, F. Oesch, and H. Gabbert. Morphological, biochemical, and molecular biological characterization of a rat rhabdomyosarcoma cell line during differentiation induction *in vitro* 187

Multistage Carcinogenesis—Risk Factors and Mechanisms

S. H. Yuspa, H. Hennings, D. Roop, J. Strickland, and D. A. Greenhalgh. The malignant conversion step of mouse skin carcinogenesis 193

P. O. Seglen and P. Gerlyng. Growth-related alterations during liver carcinogenesis: effect of promoters 197

H. G. Neumann, R. Hammerl, W. Hillesheim, and M. Wildschutte. The role of genotoxic and nongenotoxic effects in multistage carcinogenicity of aromatic amines 207

P. Cikryt, T. Kaiser, and M. Göttlicher. Binding of aromatic amines to the rat hepatic Ah receptor *in vitro* and *in vivo* and to the 8S and 4S estrogen receptor or rat uterus and rat liver 213

G. H. Degen. Role of prostaglandin-H synthase in mediating genotoxic and carcinogenic effects of estrogens 217

Indicators and Control Factors of Tumor Growth

D. T. Purtilo, M. Okano, and H. L. Grierson. Immune deficiency as a risk factor in Epstein-Barr virus-induced malignant diseases 225

T. Feizi. Observations and thoughts on oligosaccharide involvement in malignancy 231

P. Marquardt and H. K. Müller-Hermelink. Characteristics of T-lymphocytes infiltrating human B-cell lymphomas 233

B. B. Chappuis and H. K. Müller-Hermelink. Induction and progession of human lymphoproliferative lesions by Epstein-Barr virus (EBV) 237

D. Renauer, H. U. Gierlich, and K. K. Unger. Development of HPLC methods for the purification and analysis of plasma membrane glycoproteins 243

H. Kunz, P. Wernig, M. Schilling, J. März, C. Unverzagt, S. Birnbach, U. Lang, and H. Waldmann. Synthetic tumor-associated glycopeptide antigens 247

R. J. Wieser, D. Renauer, A. Schäfer, R. Heck, R. Engel, S. Schütz, and F. Oesch. Growth control in mammalian cells by cell-cell contacts 251

W. Dippold, A. Steinborn, and K. H. Meyer zum Büschenfelde. The role of the Thomsen-Friedenreich antigen as tumor-associated molecule 255

Workshop on Fiber Toxicology Research Needs

J. Dement. Overview: Workshop on Fiber Toxicology Research Needs 261

I. J. Selikoff. Historical developments and perspectives in inorganic fiber toxicity in man 269

N. A. Esmen and S. Erdal. Human occupational and nonoccupational exposure to fibers 277

J. A. Merchant. Human epidemiology: a review of fiber type and characteristics in the development of malignant and nonmalignant disease 287

V. L. Roggli. Human disease consequences of fiber exposures: a review of human lung pathology and fiber burden data 295

J. M. G. Davis and H. A. Cowie. The relationship between fibrosis and cancer in experimental animals exposed to asbestos and other fibers 305

M. Lippmann. Effects of fiber characteristics on lung deposition, retention, and disease 311

B. T. Mossman. *In vitro* studies on the biologic effects of fibers: correlation with *in vivo* bioassays ... 319
